

OUR STAGING SYSTEM

The Mity Stages present truly innovative portable stage designs, offering the freedom to build in any direction and height, over any terrain, thanks to finite leveling feet. Engineered for versatility and strength, this stage features unique cross-bracing supports that ensure a solid, wobble-free performance, instilling confidence in every performer. Setup is effortless; the decks seamlessly bridge between supports, reducing the required number of supporting frames and expediting assembly. Each deck locks automatically, aligning perfectly with riser sections to create a flawless, stable surface. Compatible with existing staging decks and locator plates, the Mity Portable Stage adapts to a wide range of applications, proving indispensable for events prioritizing quality and convenience.

SPECIFICATION

PLATFORM SIZE	2.4m x 1.2m
SURFACE TYPE	Anti- Slip Duraflex
AVAILABLE HEIGHTS	90cm - 180cm
PLATFORM WEIGHT	48kg
LOAD CAPACITY	1000kg/m ²
FRAME	Industrial Grade Aluminium (Black Anodised)

FASTFOLD STAGE LEGS WITH BRACING

Experience a secure, stable platform free from sway and noise thanks to horizontal bracing. Simplify setup with a quick, tool-free assembly process that also helps cut down on labor costs. For added safety, the Mity stage platform legs are engineered to prevent unintended folding or collapsing once the staging deck is securely in place. Enjoy enhanced storage efficiency as the stage support neatly folds into a compact size. Adjustable-height models are available to easily create portable audience risers or perfectly level performance stages.

STAGE DECKS BRIDGING BETWEEN SUPPORT STRUCTURES

Save setup time with fewer portable stage supports to set up (compared to a system with a support under every platform). Greatly reduce levelling time because 75% fewer elements contact the floor. Minimise your initial investment and storage space requirements due to the reduced need for portable stage supports. Utilize convenient, unobstructed storage space beneath the stage riser.

LOCATOR NODES ON LOCATOR PLATES

Streamline setup time as portable staging decks automatically set, align, and lock together without the need for separate clamps or tools. Experience a quieter performance surface, as the snug fit eliminates the rattling often found in old-style stage risers that rely on clamps and locks.

10 YEAR STRUCTURE WARRANTY

***A STAGE THAT IS BUILT TO LAST AND
WITHSTAND YEARS AND YEARS OF USE***

Built with the finest materials and designed to last, we offer a 10-year structural warranty for our Mity stage to give you peace of mind.

Additionally, the stage tops are replaceable. Over the years of use, if you wish to refurbish your stage to restore its appearance to brand new, we can offer a lifetime 50% discount on the replacement of the stage top.

Here's what our customers have said about Transtage

"Transtage were very easy to deal with and very helpful when the stage was delivered to our retirement village. They even showed us how to put it together. We ordered the All Terrain stage and everyone was very happy with it. The service was exceptional, and delivery was prompt. Very satisfied customers. Would recommend them."

Mary Gibbons
Living Choice Retirement Village

I am very happy to endorse the Transtage Stages which the Manly Warringah Choir uses in concert performances. They are sturdy, easy to erect and dismantle, flexible, and reasonably priced. Furthermore, I do not know of any other product which performs the same function as well as the Transtage.

Richard Griffiths
Manly Warringah Choir

Just a quick thank you for your excellent customer service. We have today erected our portable stage and our Committee is very pleased with the flexibility and quality of your product.

We look forward to purchasing more panels in the future.

Trevor Brown
